TABLE OF CONTENTS – 2005

FEBRARY 2005
Special Issue on Tomography

Preface 3
Apostolos Kantzas

Articles

Possibilities and Limits of Application of Electrical Resistance Tomography in Hydrodynamics of Bubble Columns 4
Dominique Toye, Emmanuelle Fransolet, Daniel Simon, Michel Crine, Guy L'Homme and Pierre Marchot

Development of an Electrical Resistance Tomography Reactor for Pharmaceutical Processes 11
François Ricard, Clemens Brechtelsbauer, Yun Xu, Chris Lawrence and Duncan Thompson

Void Fraction Measurement for Two-Phase Flow Using Electrical Resistance Tomography 19
Feng Dong, Yanbin Xu, Xutong Qiao, Lijun Xu and Ling'an Xu

Measurement of Solids Distribution in Suspension Flows using Electrical Resistance Tomography 24
Jay T. Norman and Roger T. Bonnecaze

Characterization of Air-Water Two-Phase Vertical Flow by Using Electrical Resistance Imaging 37
Yingxiang Wu, Hua Li, Mi Wang and Richard A. Williams

Flow Uniformity in a Model Digester Measured with Electrical Resistance Tomography 42
Dimiter S. Vlaev and Chad P.J. Bennington

Reconciling Electrical Resistance Tomography (ERT) Measurements with a Fluid Mixing Model for Semi-Batch Operation of a Stirred Vessel 48
Steven John Stanley, Hristo Hristov, Reg Mann and Ken Primrose

Improvement of Impedance Imaging for Two-Phase Systems with Boundary Estimation Approach in Electrical Impedance Tomography 55
Min Chan Kim, Kyung Youn Kim and Sin Kim

Using Electrical Capacitance Tomography to Investigate Gas Solid Contacting 64
Robert B. White

Visualization of the Function of a Biofilm Reactor by Magnetic Resonance Imaging 68
Kevin Nott, Frank Heese, Marion Paterson-Beedle, Lynne Macaskie and Laurie Hall

Measurement of pH in Food Systems by Magnetic Resonance Imaging 73
Stephen Evans and Laurie Hall

Heating of Foods Studied by Magnetic Resonance Imaging . . 78
Kevin Nott and Laurie Hall

Positron Imaging Studies of Rotating Drums 83
David J. Parker, Xianfeng Fan, Robin N. G. Forster, Peter Fowles, Yulong Ding and Jonathan P. K. Seville

Positron Emission Tomography Applied to Fluidization Engineering 88
Chutima Dechsiri, Andrea Ghione, Florence van de Wiel, Herold G. Dehling, Anne M.J. Paans and Alex C. Hoffmann

The Use of Positron Emission Particle Tracking in the Study of Multiphase Stirred Tank Reactor Hydrodynamics 97
Rob Fishwick, Mike Winterbottom, David Parker, Xianfeng Fan and Hugh Stitt

Phase Distribution in a High Pressure Slurry Bubble Column via a Single Source Computed Tomography 104
Novica Rados, Ashfaq Shaikh and Muthanna Al-Dahhan

Observation of 3-D Structure of Bubbles in a Fluidized Catalyst Bed 113
Takami Kai, Masaki Misawa, Takeshige Takahashi, Ion Tiseanu and Naoki Ichikawa

A Non-Invasive Hydrodynamic Study of Gas-Solid Fluidised Bed of Linear Low Density Polyethylene 119
Loni van der Lee, Blake Chandrasekaran, Ian Hulme and Apostolos Kantzas

Moisture Profiles Determination During Convective Drying Using X-Ray Microtomography 127
Angélique Léonard, Silvia Blacher, Pierre Marchot, Jean-Paul Pirard and Michel Crine

Using X-Ray Microtomography for Characterisation of Catalyst Particle Pore Structure 132
Luca Ruffino, Reginald Mann, Richard Oldman, E. Hugh Stitt, Elodie Boller, Peter Cloetens, Marco DiMichiel and Jose Merino

Simulation Program for Element Specific X-Ray Tomography at a 15 MeV High Power Electron Linac 140
Bert Masschaele, Luc Van Hoorebeke, Patrick Jacobs, Jelle Vlassenbroeck, Manuel Dierick and Verle Cnudde

Applications of Low Field NMR Techniques in the Characterization of Oil Sand Mining,.Extraction and Upgrading Processes 145
Apostolos Kantzas, Jonathan L. Bryan, An Mai and Florence M. Hum

APRIL 2005

Articles

A Study of the Biofiltration of High-Loads of Toluene in Air: Carbon and Water Balances, Temperature Changes and Nitrogen Effect 153
Marie-Caroline Delhoménie, Louise Bibeau and Michèle Heitz

Luca Ruffino, Reginald Mann, Richard Oldman, E. Hugh Stitt, Elodie Boller, Peter Cloetens, Marco DiMichiel and Jose Merino

Simulation Program for Element Specific X-Ray Tomography at a 15 MeV High Power Electron Linac 140
Bert Masschaele, Luc Van Hoorebeke, Patrick Jacobs, Jelle Vlassenbroeck, Manuel Dierick and Verle Cnudde

Applications of Low Field NMR Techniques in the Characterization of Oil Sand Mining,.Extraction and Upgrading Processes 145
Apostolos Kantzas, Jonathan L. Bryan, An Mai and Florence M. Hum

APRIL 2005

Articles

A Study of the Biofiltration of High-Loads of Toluene in Air: Carbon and Water Balances, Temperature Changes and Nitrogen Effect 153
Marie-Caroline Delhoménie, Louise Bibeau and Michèle Heitz

Hydrodynamics of the Stripper Section of Fluid Cokers 161
H. T. Bi, J. R. Grace, C. J. Lim, D. Rusnell, D. Bulbuc and C.A. McKnight

Drift Flux Modelling for a Two-Phase System in a Flotation Column 169
Jessica Vandenberghe, Jaewon Choung, Zhenghe Xu, and Jacob Masliyah

CFD Modelling and Simulation of Hydrodynamics in Liquid-Solid Circulating Fluidized Beds 177
Yi Cheng and Jing-Xu (Jesse) Zhu

Friction Losses in Valves and Fittings for Viscoplastic Fluids 186
Javier Telis-Romero, Marcos A. Polizelli, Ana L. Gabas and Vânia R. N. Telis

Venturi Scrubber Modelling and Optimization 194
Shekar Viswanathan, N. V. Ananthanarayanan and Barry J. Azzopardi

Experimental Study on the Hydrodynamics and Mass Transfer Characteristics of Ultrasonic Loop Airlift Reactor 204
Ping-fang Han, Li-xin Tang, Ya-qin Huang and Ping-kai Ouyang

Modelling the Rotary Lime Kiln 212
M. Georgallis, P. Nowak, M. Salcudean, and I. S. Gartshore

A Combined Mass Transfer Coefficient Model for Liquid-Liquid Systems under Simultaneous Effect of Contamination and Agitation 224
Javad Saien and Mohammad Barani

Studies on Dynamic Adsorption Behaviour of Ethyl Acetate from Air on 5A and 13X Molecular Sieves 232
Sampatrao D. Manjare and Aloke K. Ghoshal

Analyse de faisabilité, synthèse et conception des procédés de distillation réactive : état de l'art et analyse critique 242
Raphaele Thery, Xuan-Mi Meyer and Xavier Joulia

The Solubility of Phenanthrene in Toluene: In-situ ATR-FTIR, Experimental Measurement, and Thermodynamic Modelling 267
Yousef Bakhbakhi, Paul Charpentier and Sohrab Rohani

Kinetic studies and Mechanism Evolution of the Ammoxidation of 3-picoline Over V2O5/ZrO2 Catalyst 274
A. Radheshyam, Vanga S. Reddy, R. Dwivedi and R. Prasad

Optimization Study of Residuum Hydrotreating Processes 281
Hamad A. H. Al-Adwani, Haitham M. S. Lababidi, Imad M. Alatiqi and Faisal S. Al-Dafferi

Integrated Modelling of Process Operation Systems Using the Agent-Oriented Approach 291
Huanong Cheng, Xiuxi Li and Yu Qian

Mechanical Properties and Morphology of Ternary PP/EPDM/PE Blends 300
Kiril P. Tchomakov, Basil D. Favis, Michel A. Huneault, Michel F. Champagne and Florin Tofan

R&D Notes

Benzene, Toluene and p-xylene Interactions and the Role of Microbial Communities in Remediation Using Bioventing .. 310
Hong Sui, Xin-Gang Li and Bin Jiang

Stepwise Change of Operating Pressure in Vacuum Fluidized Bed Drying: An Experimental Study 316
B. U. Kozanoglu, J. Welti Chanes, A. Gonzalez Pena, D. M. Berlin Tolentino, M. Mancebo and F. Martinez

Flow Regime Maps for Flow of Liquid Through Downcomer in a Turbulent Bed Contactor 323
A. E. R. Bruce, P. S. T. Sai and K. Krishnaiah

Détermination des caractéristiques diffusionnelles de tran fert d'un solute gazeux adsorbable au sein d'un milieu poreux. Application au cas de la vapeur d'eau au sein du bois de hêtre 328
Nadia Mouchot et André Zoulalian

Spray Drying, a Versatile Synthetic Method to Control Purity in Single Phases and Mixed Phases of Bismuth Molybdates 336
Minh Thang Le, Willy J. M. Van Well, Isabel Van Driessche and Serge Hoste

Modelling Vapour – Liquid Equilibrium of CO_2 in Aqueous N-Methyldiethanolamine through the Simulated Annealing Algorithm 344
Madhusree Kundu and Syamalendu S. Bandyopadhyay

Study of the High-Pressure Vapour-Liquid Equilibria for Strongly Non-ideal Binary and Ternary Mixtures 354
Behzad Khodakarami, Hamid Modarress and Mohammad Nader Lotfollahi

Solubilities of Carbon Dioxide in Polyethylene Glycol Ethers 358
Amr Henni, Paitoon Tontiwachwuthikul and Amit Chakma

The Correlation and Prediction of Butane/Water and Gas/Butane Partition Coefficients 362
Michael H. Abraham and William E. Acree, Jr.

Citrus Essential Oil Deterpenation by Liquid-Liquid Extraction 366
Alberto Arce, Alicia Marchiaro, José M. Martínez-Ageitos and Ana Soto

Multivariable Optimal Learning Control of Wafer Temperatures in a Commercial RTP Equipment 371
Moon K. Cho, Sang R. Joo, Seung H. Won and Kwang S. Lee

On Fiber Rejection Loss in Flotation Deinking 377
J. Y. Zhu and Freya Tan

Effect of Yellowing Inhibitors on the Brightness Stability, Rheological Properties and Water Retention of Paper Coating 383
Haifa El-Sadi and Nabil Esmail

Book Review

THERMAL DATA FOR NATURAL AND SYNTHETIC FUELS 389
Reviewed by Jacques Bousquet

JUNE 2005

Articles

Mixing of Shear-Thinning Fluids with Dual Off-Centred Impellers 393
Gabriel Ascanio and Philippe A. Tanguy

Mathematical Modelling of Non-Isothermal Venturi Scrubbers 401
Amir Rahimi, Mansoor Taheri and Jamshid Fathikakajahi

Copper Recovery from EDTA – Chelating - Copper Wastewater in a Fluidized Bed 409
Chien-Hsin Yang, Wen-Churng Lin and Wei-Tung Liao

Determination of Intrinsic Minimum Bubbling Velocity in Fine Powder Aerations Based on Experimentally Measured Elastic Deformation Coefficients 418
Wiratni Wiratni and Hisashi O. Kono

Flow Characteristics in a Vortex Chamber 425
Georgios H. Vatistas, Ali M. Jawarneh and Henry Hong

Steady Two-Dimensional Non-Newtonian Flow Past an Array of Long Circular Cylinders up to Reynolds number 500: A Numerical Study 437
A. A. Soares, J. M. Ferreira and R. P. Chhabra

Wall Effects in Two-Dimensional Axisymmetric Flow Over a Circular Disk Oriented Normal to Flow in a Cylindrical Tube 450
S. Nitin and R. P. Chhabra

Modélisation Mathématique de la Décantation de la Boue Rouge 458
Guy Peloquin, Rung Tien Bui, Duygu Kocaefe et Guy Simard

Ébullition par Convection Forcée des Mélanges Eau-Ammoniac dans un Tube Vertical 466
Tahar Khir, Ammar Ben Brahim and Rahim Kadhim Jassim

Chemical Composition Determination at the Bottom Region of a Recovery Boiler Furnace by Direct Minimization of Gibbs Free Energy 477
Andréa O. S. Costa, Evaristo C. Biscaia Jr., Enrique L. Lima

Vapour-Liquid Equilibrium in Binary Aqueous Mixtures using a Modified Regular Solution Model 485
V. H. Alvarez, C. A. Faúndez and J. O. Valderrama

Modelling Oxygen Transfer and Aerobic Growth in Shake Flasks and Well-Mixed Bioreactors 493
Hossein Nikakhtari and Gordon A. Hill

Simplified Model for Oxygen Transport With Reaction in a Polymer-Electrolyte Fuel Cell 500
Larry J. Forney, J. Michael Brown, Bryan M. Kadlubowski and Jude T. Sommerfeld

Liquid-Phase Hydrogenation of m-phenoxybenzaldehyde to m-phenoxybenzylalcohol Using Raney Nickel Catalyst: Reaction Kinetics 508
Sunil P. Bawane and Sudhirprakash B. Sawant

Enhancing Controller Performance via Dynamic Data Reconciliation 515
Shuanghua Bai, David D. McLean and Jules Thibault

Analyse Expérimentale et Numérique du Comportement de Membranes Thermoplastiques en ABS et en HIPS dans le Procédé de Thermoformage 527
Fouad Erchiqui et Abdessalem Derdouri

Iron, Manganese and Copper Equilibria with Wood Fibres in Single Salt Aqueous Suspensions 537
Robin Susilo, Rajeev Chandraghatgi, Xiao-Sen Li and Peter Englezos

R&D Notes

Visual Observations of Air-Water Two-Phase Flow Across Small Diameter Tubes With Vertical Return Bends 548
Chi-Chuan Wang, Ing Youn Chen, Pi-Shan Huang and Bing-Chwen Yang

Experimental Investigation into the Hydrodynamics of Flow of Solids through a Loop Seal Recycle Chamber 554
Eugene Botsio and Prabir Basu

Drag on Freely Falling Cones in Newtonian and in Power Law Fluids 559
Aparajita Borah and Rajendra P. Chhabra

The Voidage Function for the Drag Force Ratio in a Liquid-Fluidized Bed 566
Norman Epstein

Possible On-Line Methods of Removing Oxide Deposits from Inside Steam Generator Tubes 573
N. Arbeau, P. Mackenzie and D. H. Lister

Correct Way of Reporting Results when Modelling Supercritical Phase Equilibria using Equations of State 578
José O. Valderrama and Víctor H. Alvarez

The Parastillation Efficiency and Hydrodynamic Behaviour 582
Juliana Belincanta, Teresa Massako Kakuta Ravagnani and João Alexandre Ferreira Pereira

Role of Citric Acid in Delaying Gypsum Precipitation 586
Marina Prisciandaro, Armando Santucci, Amedeo Lancia, Dino Musmarra

Effect of Superimposed Pulsating Flow on Liquid-Solid Mass Transfer in Fixed Beds 593
Magdy Zaki, Inderjit Nirdosh, Malcolm H. I. Baird and Gomaa H. Sedahmed

Generalized Common Model Control 599
Bingjun Guo and Jinshou Yu

Influence of Fillers on Sizing Efficiency and Hydrolysis of Alkyl Ketene Dimer 603
A. Karademir, Y. S. Chew, R. W. Hoyland and H. Xiao

AUGUST 2005

Message from the Incoming Editor 609
K. Nandakumar

Articles

A Review of Recent Technological Advances in the Brightening of High-Yield Pulps 610
Yonghao Ni

Review on Mixing Characteristics in Solid-Liquid and Solid-Liquid-Gas Reactor Vessels. 618
Gopal R. Kasat and Aniruddha B. Pandit

Hydrodynamic Characteristics of a Powder-Particle Spouted Bed with Powder Entrained in Spouting Gas 644
Qunyi Zhu, C. Jim Lim, Norman Epstein and Hsiaotao T. Bi

Écoulement de Taylor-Couette en géométrie finie et à surface libre 652
Mahamdia Ammar, Bouabdallah Ahcène et Skali Salah Eddine

The Impact of Local Phenomena on Mass Transfer in Gas-Liquid Systems 658
Olaf Bork, Michael Schlueter and Norbert Raebiger

On Criteria for Occurrence of Azeotropes in Isothermal and Isobaric Binary Systems. 667
Ronald W. Missen

Numerical Simulation of Pollutant Formation in Precalciner 675
Lai Huang, Jidong Lu, Shijie Wang and Zhijuan Hu

Dibenzothiophene HDS Over Sulphided CoMo on High-Silica USY Zeolites 685
Gerardo Lara, José Escobar, José A. De Los Reyes, María C. Barrera, José A. Colín and Florentino R. Murrieta

Heat Removal from Reverse Flow Reactors Used in Methane Combustion. 695
Sukumar Balaji and S. Lakshminarayanan

Simulation of Radiation Field in Multilamp Photoreactor Using the LSDE Model 705
Quan Yang, S. O. Pehkonen and Madhumita B. Ray

A Comparison of PID Controller Tuning Methods 712
Michael W. Foley, Rhonda H. Julien and Brian R. Copeland

Attainment of PI Achievable Performance for Linear SISO Processes with Deadtime by Iterative Tuning. 723
D. B. Goradia, S. Lakshminarayanan and G. P. Rangaiah

Recyclage d'un déchet, une boue rouge, comme catalyseur pour l'élimination des composés organiques volatils 737
J. F. Lamonier, F. Wyrwalski, G. Leclercq et A. Aboukaïs

Méthodologie d'étude et de modélisation de la déphosphatation d'effluents aqueux 742
L. Montastruc, S. Domenech, L. Pibouleau, C. Azzaro-Pantel

The Effect of Particle Size Distribution on Pressure Drop through Packed Beds of Cooked Wood Chips 755
Quak Foo Lee and Chad P. J. Bennington

R&D Notes

A Study on Hydrodynamics and Heat Transfer in a Bubble Column Reactor with Yeast and Bacterial Cell Suspensions 764
Nigar Kantarci, Kutlu O. Ulgen, Fahir Borak

Décantation assistée par ultrasons des eaux résiduaires 774
Nicolas Augis, Philippe Hus, Pierre-Xavier Thivel et Jean-Yves Viau

Dispersion and Mass Transfer Effects on the Performance of an Immobilized Lipase Packed Bed Reactor During the Hydrolysis of Rice Bran Oil 780
V. Ramachandra Murty, Jayadev Bhat, P. K. A. Muniswaran and S. Sivasankaran

Challenging the Traditional Counter-Current Water Circulation System Case: Washing of Soap in a Kraft Pulp Fibreline 784
Kari Ala-Kaila, Outi Poukka, Pekka Tervola

OCTOBER 2005

Articles

Drop Breakup in an SMX Static Mixer in Laminar Flow 793
Shiping Liu, Andrew N. Hrymak and Philip E. Wood

Quantitative Estimation of Permeability with Lattice Boltzmann Simulations: Representative Porous Media from Composite Processing 808
Abhijit P. Deshpande, A. Srikanth and N. Praveen

Solid Suspension in Jet Mixers 816
Rajesh N. Kale and Ashwin W. Patwardhan

Numerical Simulation of Oil-water Hydrocyclone Using Reynolds-Stress Model for Eulerian Multiphase Flows 829
Si Huang

Minimizing Impeller Slurry Wear through Multilayer Paint Modelling 835
J. Wu, B. Ngyuen, L. Graham, Y. Zhu, T. Kilpatrick and J. Davis

A Theoretical Study of the Recycle Effect on Multi-Pass Mass Exchangers with Three Idealized Membranes Inserted 843
Chii-Dong Ho and Jr-Wei Tu

Hydrodenitrogenation and Hydrodesulphurization of Heavy Gas Oil Using NiMo/Al_2O_3 Catalyst Containing Phosphorus: Experimental and Kinetic Studies 855
D. Ferdous, A. K. Dalai and J. Adjaye

Prediction of Hydrate Phase Equilibria in Aqueous Solutions of Salt and Organic Inhibitor Using a Combined Equation of State and Activity Coefficient-Based Model 865
Amir H. Mohammadi and Bahman Tohidi

Comprehensive Modelling of the Pitting Biocorrosion of Steel 872
M. M. Al-Darbi, K. Agha and M. R. Islam

Numerical Study of the Effect of Particle Size on the Coating Efficiency and Uniformity of an Electrostatic Powder Coating Process 882
Z. Li, C. Zhang and J. Zhu

Development of an Electrochemical Device for Removal of Arsenic from Drinking Water 889
Farida Sagitova, Dorin Bejan, Nigel J. Bunce, and Ron Miziolek

Electrically Conductive Fibre Composites Prepared from Polypyrrole-Engineered Pulp Fibres 896
Bin Huang, Guojun Kang and Yonghao Ni

R&D Notes

Operating Conditions for High Production Rates of Ethanol in a Continuous Two-Stage Fermenter with Cell Recycle 904
Akio Nishiwaki and Irving J. Dunn

2004 Best Paper Award 909

Book Review

Fundamentals of Multiphase Flow 911
reviewed by Saeid Mokhatab

Erratum 912

DECEMBER 2005

Review

Viscoelastic (Non-Fickian) Diffusion 913
D. De Kee, Q. Liu and J. Hinestroza

Articles

Improvement of the Fluidizability of Cohesive Powders through Mixing with Small Proportions of Group A Particles 930
A. Ajbar, K. Alhumazi and M. Asif

The Effects of Screw Geometry on the Pumping Efficiency of Micro-Screw Pump 944
Haifa El-Sadi and Nabil Esmail

A Novel Predictive Technique for Estimating the Hydrate Inhibition Effects of Single and Mixed Thermodynamic Inhibitors 951
Amir H. Mohammadi and Bahman Tohidi

Phase Equilibria for Ternary Liquid Systems of (Water + Carboxylic Acid + 1-Heptanol) at 293.15 K: Modelling Considerations 962
Aynur Senol

Catalytic Activity of Copper Oxide Impregnated HZSM-5 in Methanol Conversion to Liquid Hydrocarbons 970
H. A. Zaidi and K. K. Pant

Dry-Reforming of Ethanol in the Presence of a 316 Stainless Steel Catalyst 978
K. De Oliveira-Vigier, N. Abatzoglou and F. Gitzhofer

Dissolution Rate of BTEX Contaminants in Water 985
Derrick O. Njobuenwu, Stephen A. Amadi and Peter C. Ukpaka

R&D Notes

Analytic Expressions of Ultimate Gains and Ultimate Periods with Phase-Optimal Approximations of Time Delays 990
Jietae Lee, Ho Cheol Park and Su Whan Sung

Assessment by Microscopy of the Coverage of Sludge Flocs by a Nano-scale Surface Layer 996
Dorothy Pazin, John N. A. Lott, M. Marcia West and Gary G. Leppard
